The sears being a tie is outers, ioners, centres, and buil's eyes, the rules required that the total of each round in inverse order by taken. According to this the total of the seventh round of the Washington Light Infantry and the R firs was a tip, and therefore had to go to the sixth round, where the footing of the Rifles exmeded that of the lafantry by four points. The referees of the respective teams not being thoroughly posted in the rules of the National Association, they decided to refer the question to that association for their decision. After the regular shooting for the cap was concluded, a match was made between Cash, of the Washington light laftatty Corps, and Johnston, of the Rolles, at 200 yards, for \$5, each one to be to be contended for in the approaching camentitled to five measure shots. After quite a spirited contest the match was wan by Juneston. thy eleven naches.

CLOSING EXERCISES. - The closing exercises of Mass Daner's School took plack on Wednes day. Gold medals, for attaining the first grade in scholar-hip, were awarded to Misses Fannie E. King, Lig A. Hill, and Mary C. Beyant; silver medals, for the second grade in scholars ship, to Marter Julian T. Miller and Misses Mery C. Rold, Eather F. Brookes, Florence Wirt and Finnie S. Herbert. Handsome cards were presented to those pupils who had not recoived a had conduct mark during the year. These receiving them were Mesters Julian I. Miller, and Harold Snifer, and Misses Loura King, Lily Hol, Anne Herbert, Forence Wird and Mary Bryant. Miss Lours King received an album for diligence in all her studies. Beautiful fl ral cards were given to the following pupile for never failing in Biblical recitations; Mesters Willio L. Boothe, Gardner L. Boothe, Willie Reird, and Julian F. Miller, and Misses Liura Keng, Li y Hill. Aque Herbert, Fanni Harbert and Fibrasca Wirt.

The pupils of Washington and Cus is schools colored, were thoroughly examined in the variour branches of their pudies to day by Dr. Gregory and Mr. Thomas Leadbeater, trustees who were well pleased with the progress mad: by the scholars and the method of instruction pursued by the teachers.

THE DYING BARE .- About sars it yesterday while scores of intile children were skipping about in thoughtless glee, an innocent babe lay ear the front window of a small house in the nottom near the tunnel, on Wilkes st., dying I composed one of a group of five small immor who, like the famous little maid in the sn-Equated school books, were of too tender year, a comprehend the work of the rider of the pale end; and though the avocation of item gather-for this column often renders the writer an inwilling witness of much greater human woo. horas more calculated to cast a saf gloom ver the seasibilities than to view afflictions amid childless prattle, where the guileless sufferor east; imploring looks for relief into maternal eyes powerloss to assuage its agony, and which an answer by nothing but burning tears. The the suffers alluded to had every attention sedical skill and neighborly love could command; and praises were numerous from passers by to the two tender-hearted physicians who sent nearly the whole afternoon by the side of is couch, and who were with it to the last. But, while there is only One who can pour the oil of pusolation and joy into the wounded soul, we could in collected moments realize and enjoy the solace of the words of the great Sympathizer with our race, who tells us in unmistakable terms that an abundant entrance into eternal glory is afforded deceased little ones, to say othing of the manifold trials and afflictions in ident to life they thus escape by early demise. Again have the pearly gates ope'd upon their

silvery binges;
And angels numetrant have taken from fond arms a tender ewe lamb,
To nurture it, so Jesus wills, in heaven.

ALEXANDRIA ENTERPRISE -The courcils of other cales and towns of the State may well imits to the wisdom of the City Council of Alexandris in affording substantial encouragement to manufacturing enterprises. A number of capnalists have purchased, in that city, a large amount of property on which they will erect extensive iron and ore works, and the council kave exempted the plant of the company from corporate taxation for twenty years. The council readily appreciate the immense benefits which a large manufacturing enterprise will bring to the town, and in a true spirit of devotion to their city's interest have done all in their power to foeter the enterprise. One of the most untful sources of prosperity for Virginia lies in er great adaptation to enterprises of this kind, and if the advances of capitalists are met by a stoper exhibition of public spirit, they will apring into active being throughout the State. We should have ore furnaces, rolling mills, often and weelen mills, fruit canning estabaments, spoke and hub factories, paper mills, and all such manufacturing establishments as are onstantly drawing tribute from us to the North. We are fitted for them by nature. She, in her hour thous goodness, has placed the "talent" in our hands and as "good stewards" it is our duty to improve them - Charlottesville Jeffersonian.

COMMISSIONER OF ACCOUNTS. - Judge Chilion, of the Corporation Court, to day appointed Charles W. Dearborn Commissioner of Accounts, and, as the law provides for but one such officer, it is supposed that he will, therelate, take the place of F. M. Huster. The du ties of the Commissioner comprise the settlement of the accounts of all guardians, executors, administrators and other fiduciaries, and the resition requires legal as well as high business qualifications and experience, in order to protect the interests of widows and orphans, The appointment has caused no little astonishment, and is supposed to have been made entirely on political grounds. Dearborn being a Pronounced Mahone readjuster.

M.j. J. A. Evans, of Gordonsville, has been appointed a parlor car conductor on the fast trein on the Midlard Railroad, between Wash itgton and White Sulphur Springs.

The ball from the pistol entered Payne's right coat sleeve at the wrist and passed out at the elbow, grezing the arm and inflicting | ner King and Washington sts. only a sight flish wound, amounting to nothing more serious than an abrasion. Officers James Smith and Julian Arnold immediately appeared on the scene and arrested both Payne and Burke and ledged them in the station house until au examination c.u.d be held, which took place at once before the Mayor, Justices Thompson and Ballenger. Burke was committed without bail for further examination, and l'ayne was released on \$500 bail, with Mr. S. J. Reed as 187 his surery, to keep the pesco until three

Sispressial changes in voice, facial expression. Ac. but may have artificial tooth made before and inserted immediately after extraction of their natural teeth. By this mode a better adoptation, a more pleasant expression and a nearer approach to ward preserving the natural harmony of the features are secured and very much of the pain and difficulty experienced in learning to use teeth are also avoided. I have practiced this mode successfully for seven years, and having introduced it here, would be glal to refer any one interested to patients who know offit from experience. In treating the natural teeth my object is to preserve every one that time, patience and modern methods of treatment can save. The use of arsenic in destroying exposed nerves is condemned by the more ealightened of the dental profession on account of its turning teeth dark, inducing abscess and finally the loss of the teeth. The nerve pulp, which is the source of life to the tooth, should always be treated, when exposed, with a view to its restoration to health.
